alumina propone oggetti realizzati a partire da esclusive leghe di alluminio in cui l'estetica si spoglia del superfluo per valorizzare la funzionalità e la bellezza della materia. Per questa collezione è stata utilizzata la pregiata lega dei prodotti **DVNE Milano**, dalla particolare grana superficiale, completamente riciclabile. La tornitura artigianale utilizzata per i prodotti definisce infatti oggetti sempre diversi l'uno dall'altro, raccontando di una materia plasmata sapientemente e con cura, nella cui autenticità risiede il valore di prodotti mai uguali a se stessi.

alumina proposes objects made from exclusive aluminum alloys in which aesthetics are stripped of the superfluous to enhance the functionality and beauty of the material. For this collection we used the high quality alloy of **DVNE Milano** whose surface texture, completely recyclable, is mechanically obtained during the cutting phase of the aluminium blocks. The artisanal turning process used for the products makes objects that are always different from one another, telling of a material wisely and carefully molded, in whose authenticity lies the value of products that are never the same.

PRODUCT	DESCRIPTION	SIZE	DESIGN	CODE	COLOR
